CLAYSCORER PRO

Example outputs — all disciplines

This document shows the two outputs the app produces for a completed round, for every discipline, using one fully scored example round each:

- **Scorecard image** — what *Export › Share scorecard image* sends and *Export › Show scorecard* displays in the app. A second image lists the clay presentations when any are described.
- **Print / save as PDF** — the scorecard page, followed by a separate presentations page when any clays are described.
- **Presentation** — *Export › Presentation*: a 16:9 slide deck with stats, charts, awards and data-driven roasts, viewed in the app or saved as PDF. One example (English Sporting) is at the end.

Discipline	Layout	Shooters	Clays described	Outputs shown
ESP English Sporting	10 stands · 62 targets	4	22	2 images + 3-page PDF
STR Sportrap	5 rounds · 25 targets	4	25	2 images + 2-page PDF
CSP Compak Sporting	5 rounds · 25 targets	4	35	2 images + 3-page PDF
ESK English Skeet	7 stations · 24 + option targets	4	—	1 image + 1-page PDF

Hit Miss Scores are shown by colour only. Shooters are sorted by total.

Sample data: shooter names, CPSA numbers, ground and events are fictitious. English Skeet has no clay presentations, so it has a single image and a single PDF page. Long presentation lists continue onto further PDF pages, as they would when printed from the app. Generated 13/11/2026.
